

SOFTWARE FOR CAFES & RESTAURANTS

Run the whole cafe from **one** **connected system.**

A walk-through of the screens your guests, your counter staff, your kitchen and you as the owner would use every day. Every module here can be picked on its own or rolled out together.

Website

Counter & kitchen

Loyalty app

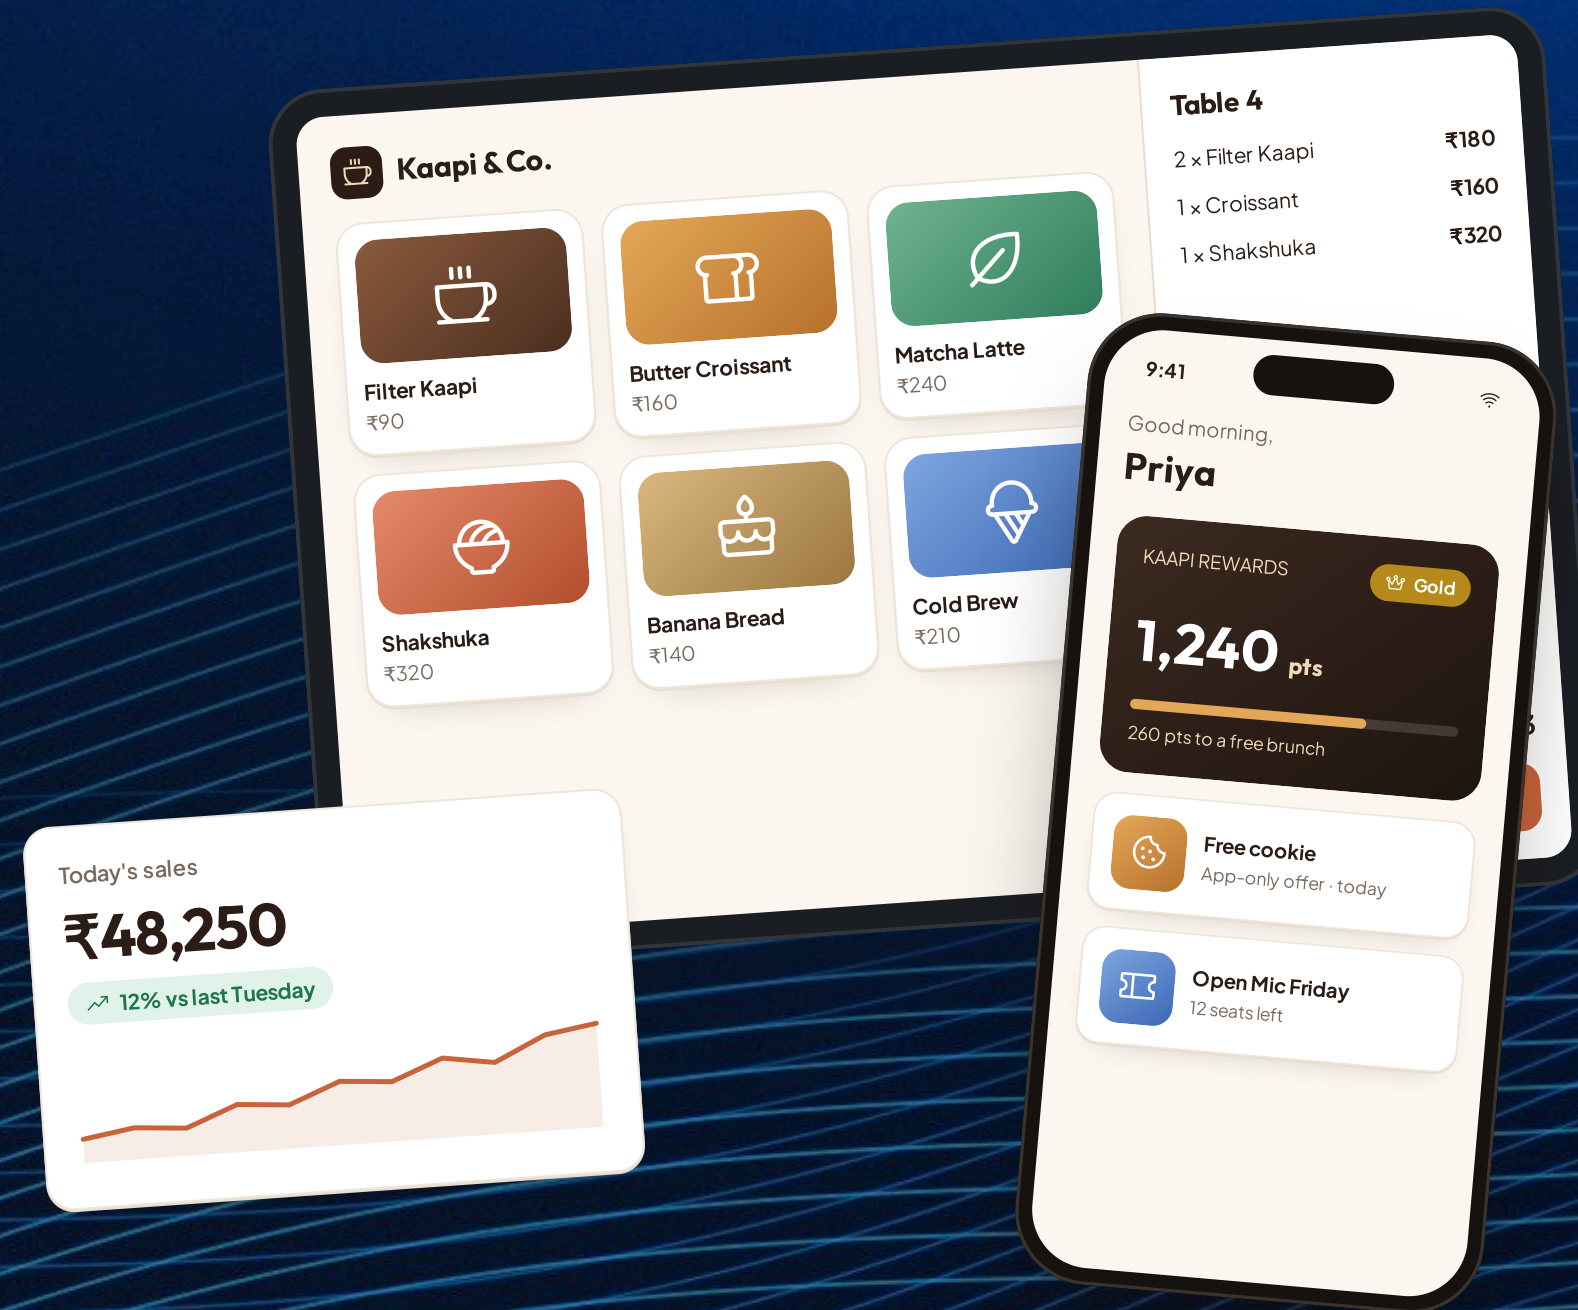

Cowork booking

Events

Inventory

Finance analytics

Billing

Eight modules. One login, one menu, one set of numbers.

Each module is useful on its own. Together they share the same customers, menu and stock, so an order at the counter updates the kitchen, the stock room, the customer's points and your sales report at the same moment.

01

Website & landing page

Your menu, online orders, table bookings, events and desk booking on one fast site.

Guests

02

Counter & kitchen

Cashier screen that sends each order straight to a kitchen screen. No paper slips.

CashierKitchen

03

Loyalty & rewards app

Points, stamps, tiers and app-only offers that bring regulars back more often.

GuestsOwner

04

Cowork space booking

Guests see free desks and rooms by the hour, pick a seat and pay in advance.

GuestsFront desk

05

Events & programs

Publish an event, followers get notified, they book, get reminders and check in by QR.

GuestsOwner

06

Inventory

Stock goes down by itself with every sale. Low stock alerts and one-tap purchase orders.

Store manager

07

Finance analytics

Live sales, best sellers, busy hours, costs and profit on one owner dashboard.

OwnerAccountant

08

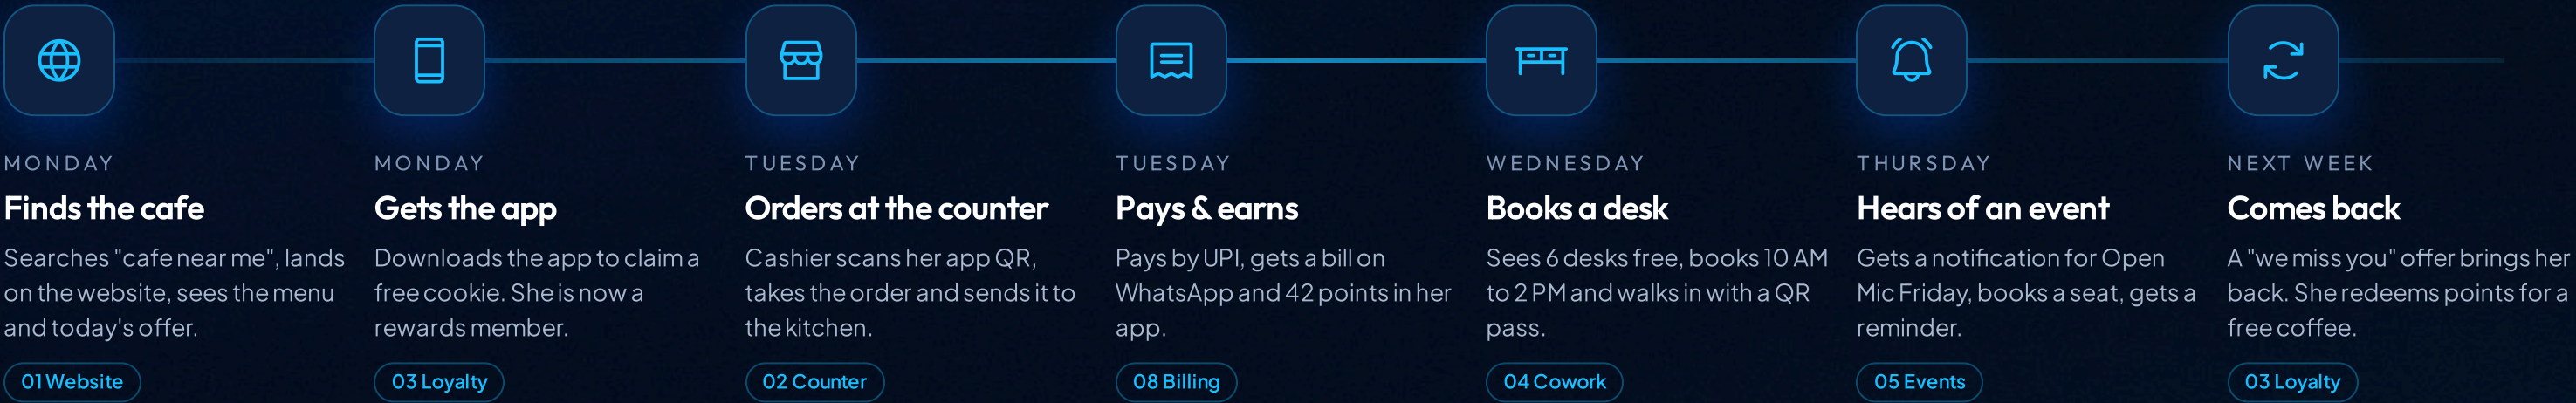

Billing & payments

GST-ready bills, split payments, UPI QR, digital receipts and a clean day-end close.

CashierAccountant

Follow one guest, Priya, through a normal week.

This is the easiest way to see how the modules connect. Each step below is a screen shown later in this deck.

Meanwhile, behind the counter

Nobody types anything twice. Each step above quietly updates these.

Stock goes down

Every coffee sold deducts beans, milk and a cup. Low items raise an alert.

Numbers go up

Sales, busy hours and profit on the owner dashboard update live.

You learn your guests

Visits, favourites and spend build a profile you can reward and invite.

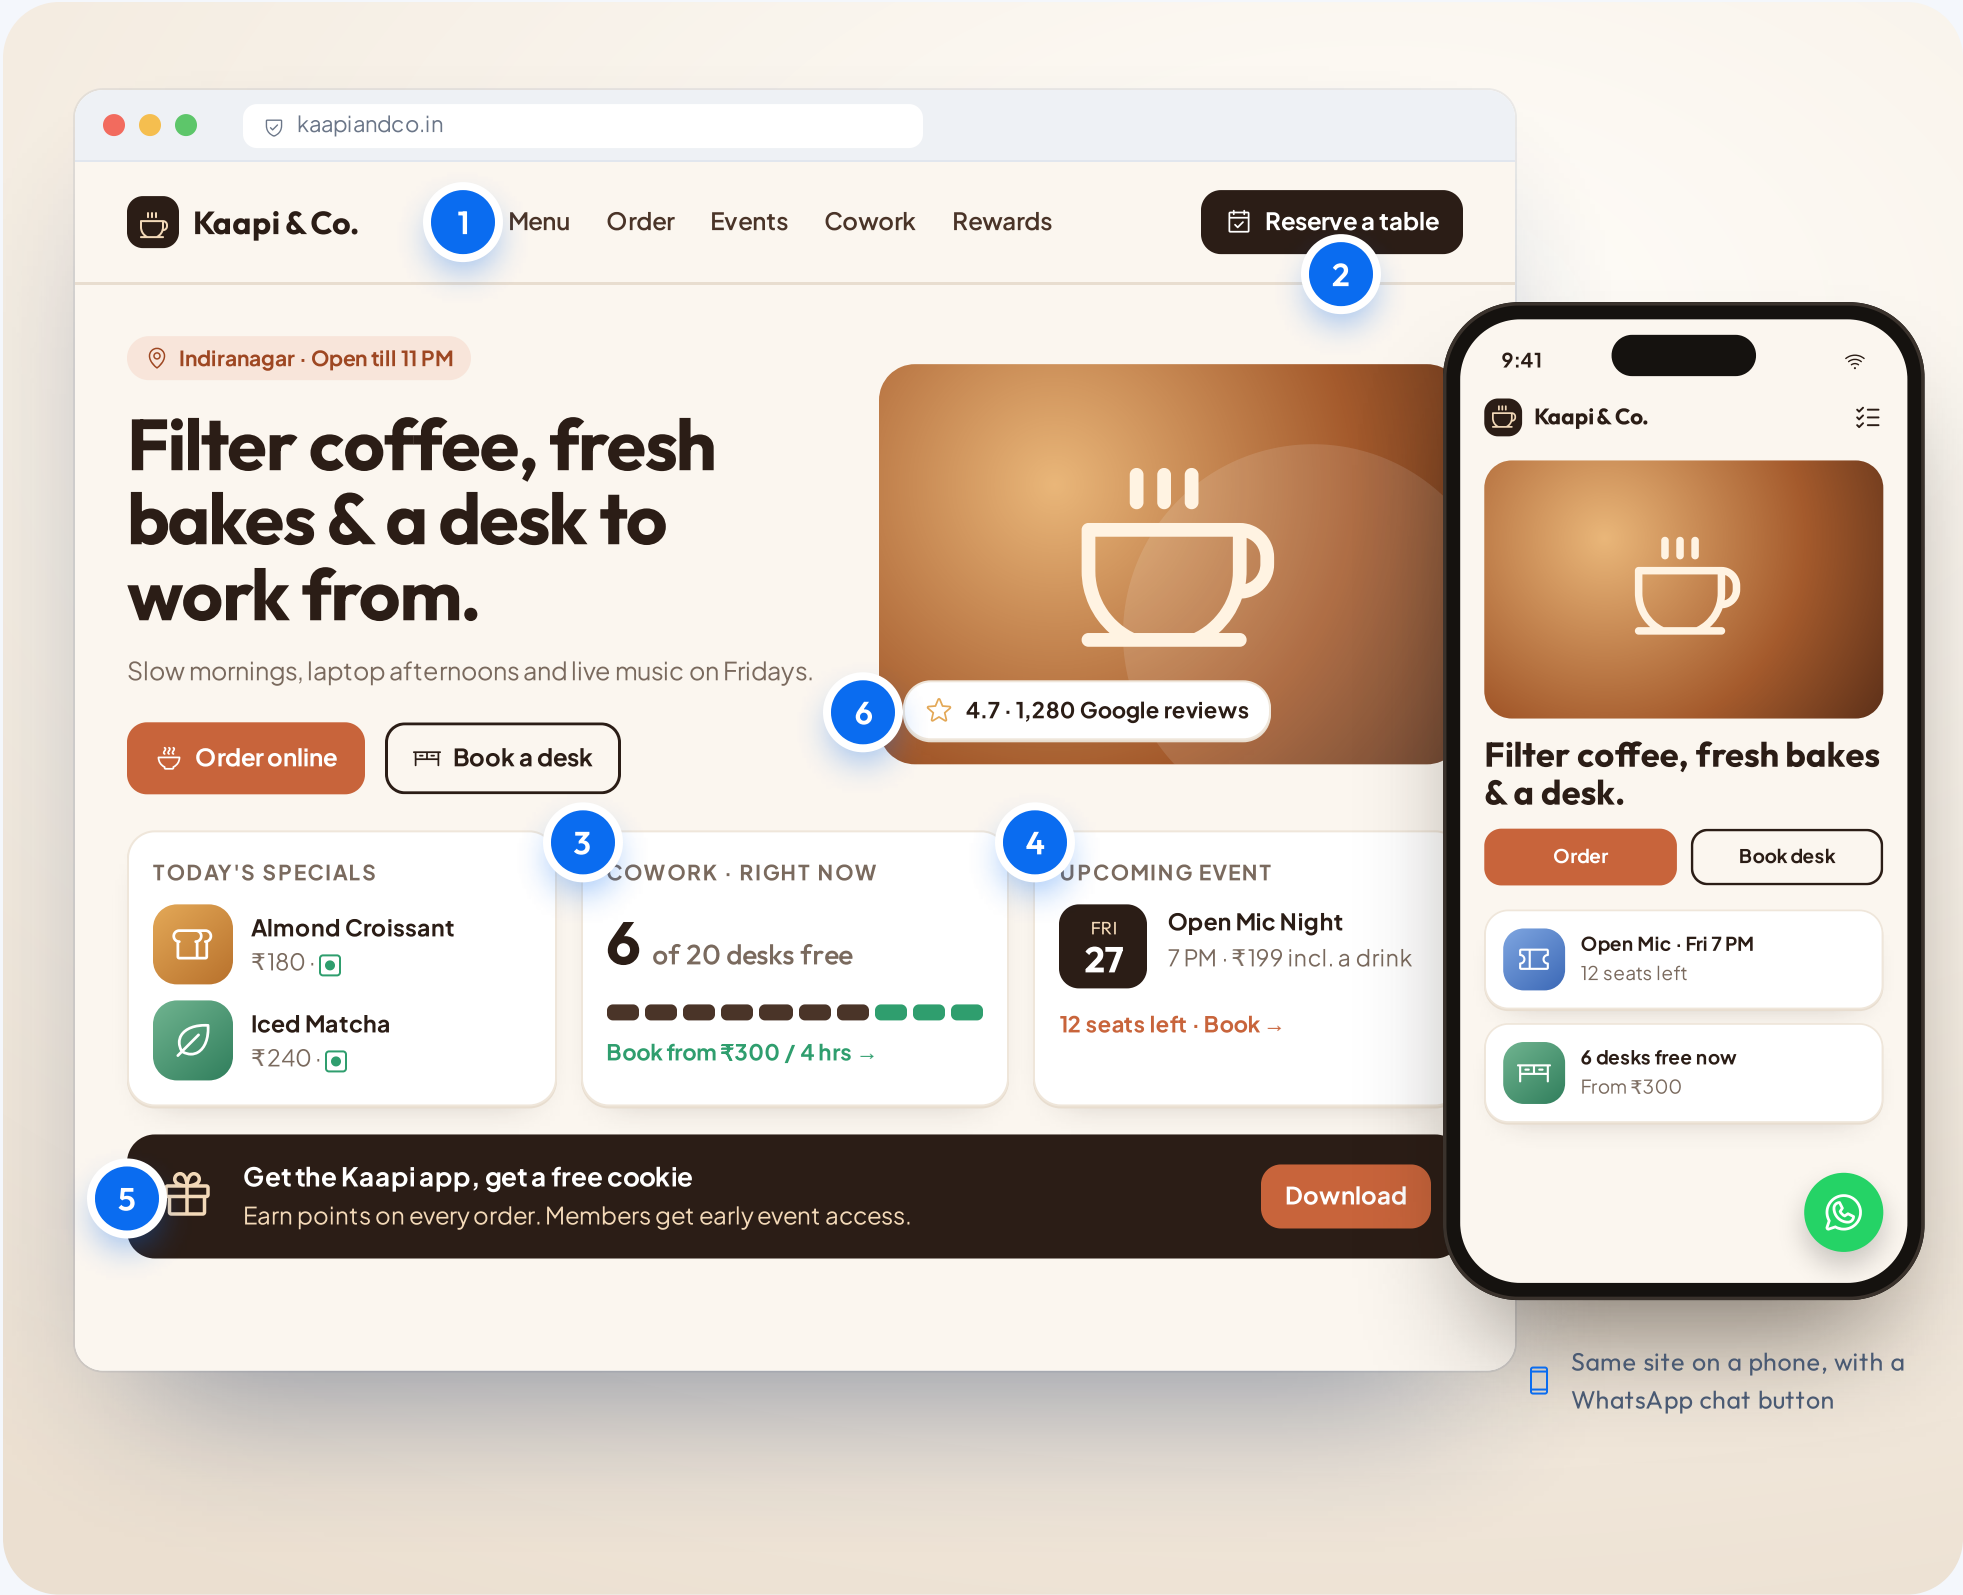

Website & landing page

Your cafe's front door on the internet. It shows who you are, and lets people order, book and sign up without calling you.

- 1 Menu & online ordering**
Live menu with photos and prices, synced with the counter. Items that run out hide themselves.
- 2 Reserve a table**
Guests pick date, time and party size. You see it on the counter screen.
- 3 Live desk availability**
Shows how many cowork seats are free right now, with a Book button.
- 4 Upcoming events**
Every event you create appears here automatically.
- 5 App download offer**
A banner that turns website visitors into rewards members.
- 6 Found on Google & WhatsApp**
Reviews, map, opening hours and a one-tap WhatsApp chat. Built to rank for "cafe near me".

WHY IT MATTERS

- 🔍 More people find you
- % No aggregator commission on direct orders
- 📱 Works on every phone

📱 Same site on a phone, with a WhatsApp chat button

Counter ordering screen

A tablet at the counter that anyone can learn in ten minutes. Tap items, add notes, send to the kitchen, take payment.

- 1

Dine-in, takeaway or delivery
Pick the order type and table. Online orders land in the same list.
- 2

Tap to add items
Big picture buttons by category, with search. Sold-out items are greyed out.
- 3

Customise the order
Oat milk, less sugar, extra shot. Add-ons are priced automatically.
- 4

Attach the rewards member
Scan the guest's app QR or type their phone number to add points.
- 5

Send to kitchen
One tap sends the order to the kitchen screen. No handwritten slips.
- 6

Take payment
UPI, card, cash or a mix. Bill prints or goes to WhatsApp.

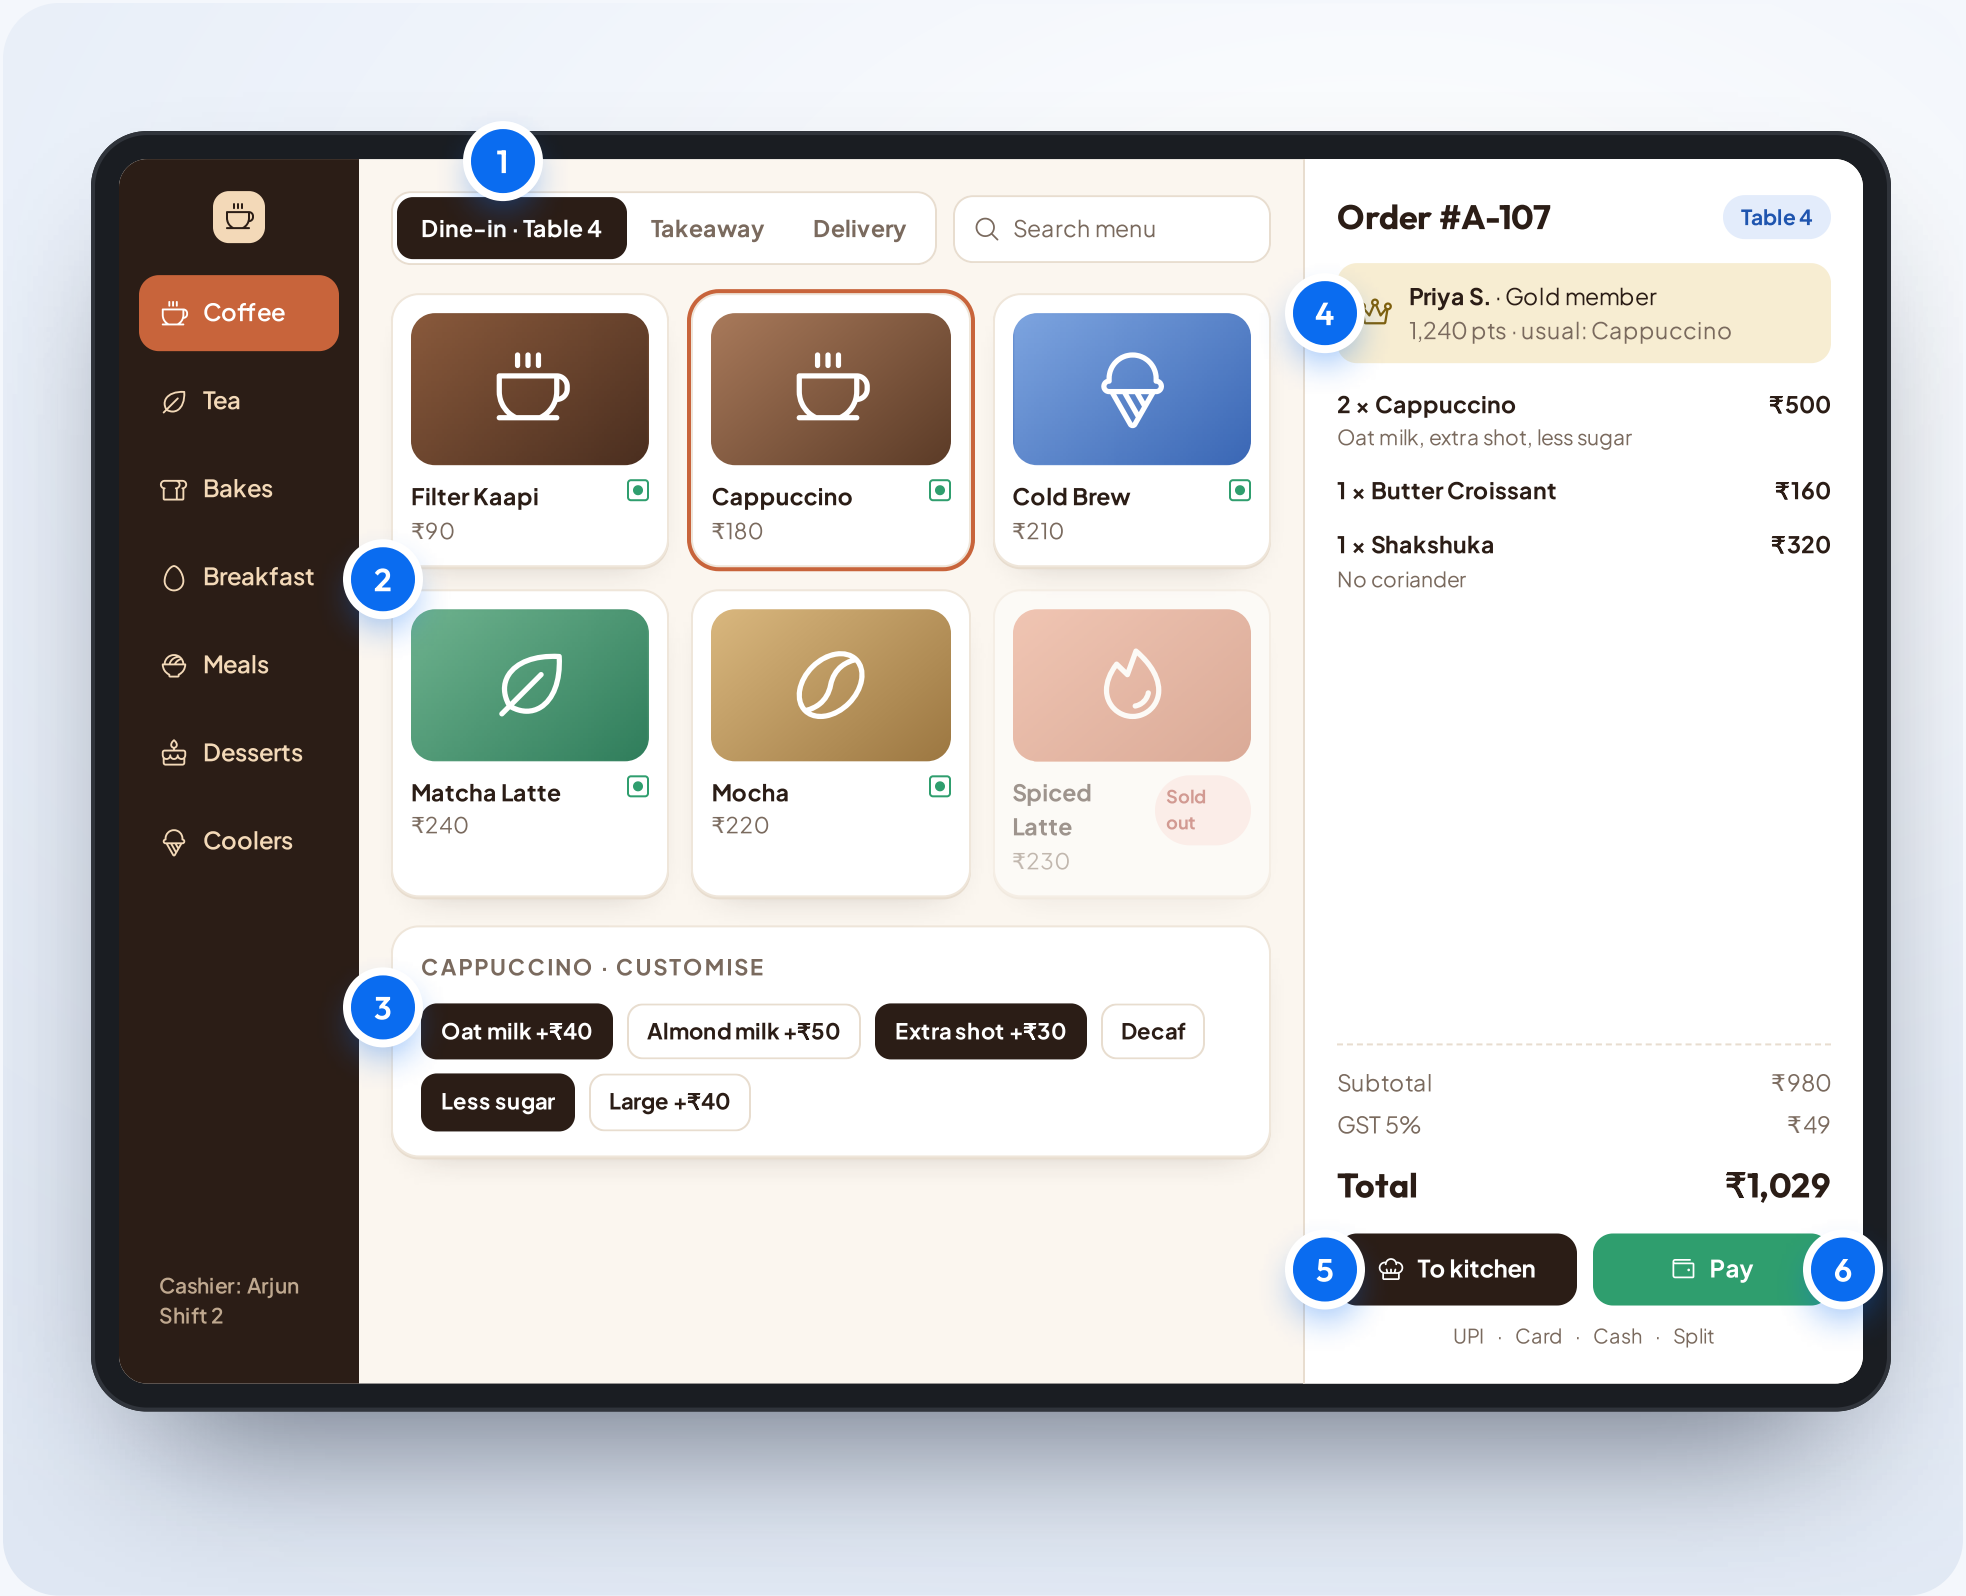

WHY IT MATTERS

- 

Faster queue
- 

Fewer wrong orders
- 

Keeps working if the internet drops

Kitchen display screen

A screen in the kitchen replaces paper order slips. Orders appear the second the cashier taps "send", and the kitchen taps them done.

- 1

Orders arrive instantly

With table number, notes and add-ons in large, readable text.
- 2

Colour-coded timers

Green is on time, amber is getting slow, red needs attention now.
- 3

Each station sees its part

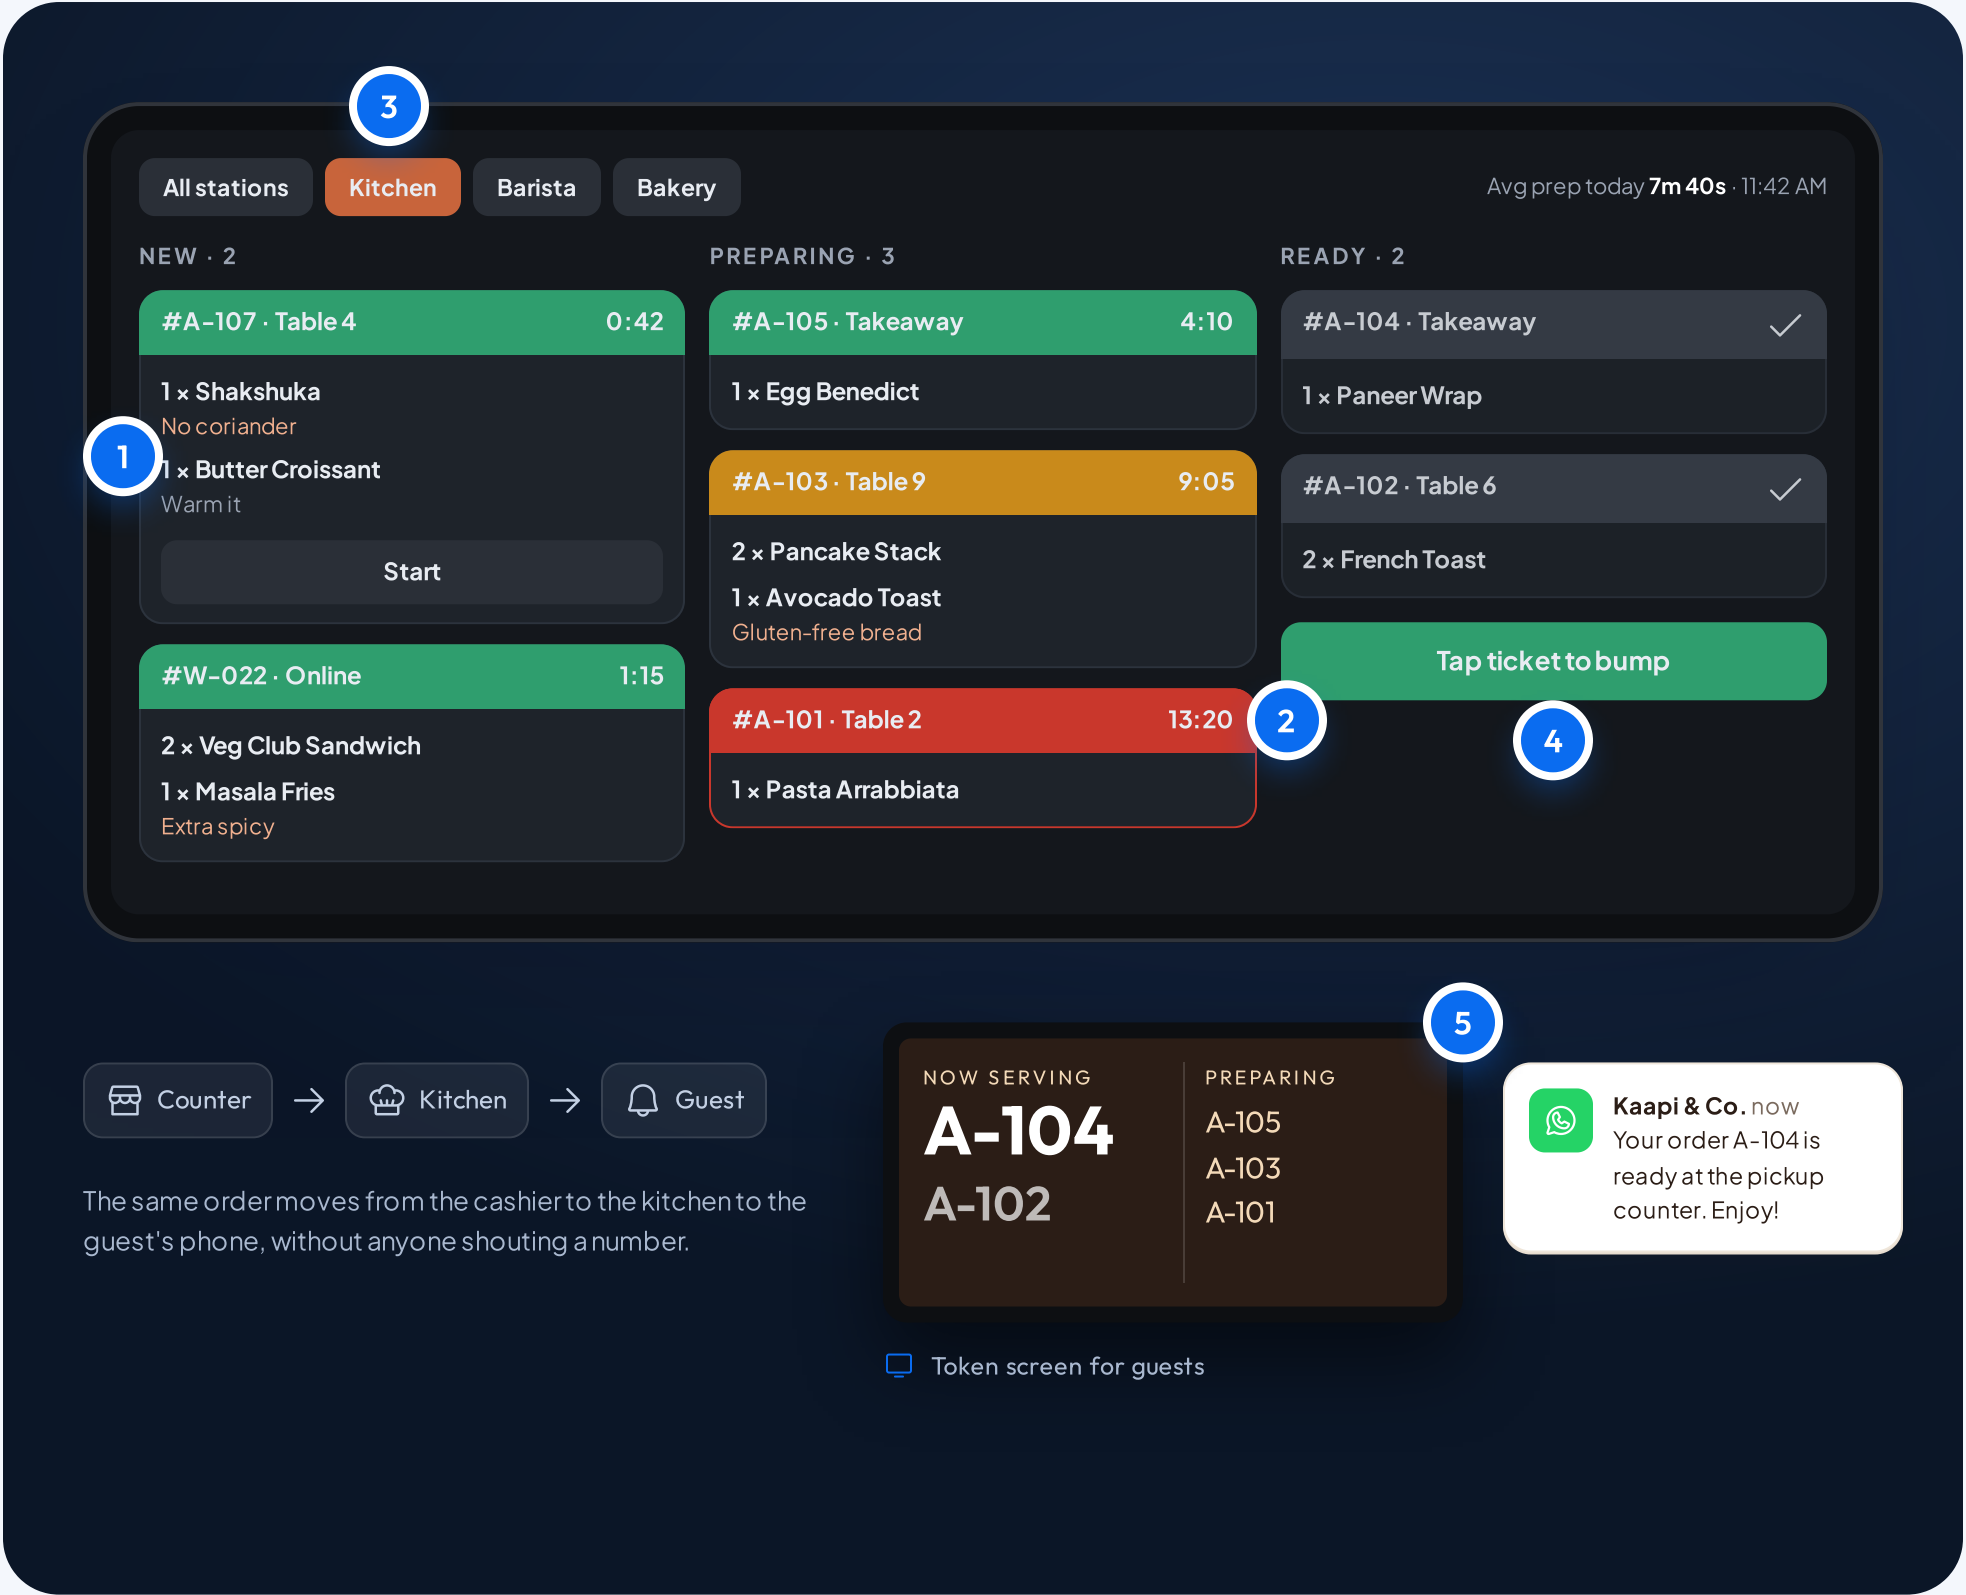

The barista sees drinks, the kitchen sees food, the bakery sees bakes.
- 4

Tap to mark ready

The ticket moves along. The cashier and waiter know it is ready.
- 5

Guest gets called

Token number shows on a TV and the guest gets a "your order is ready" message.

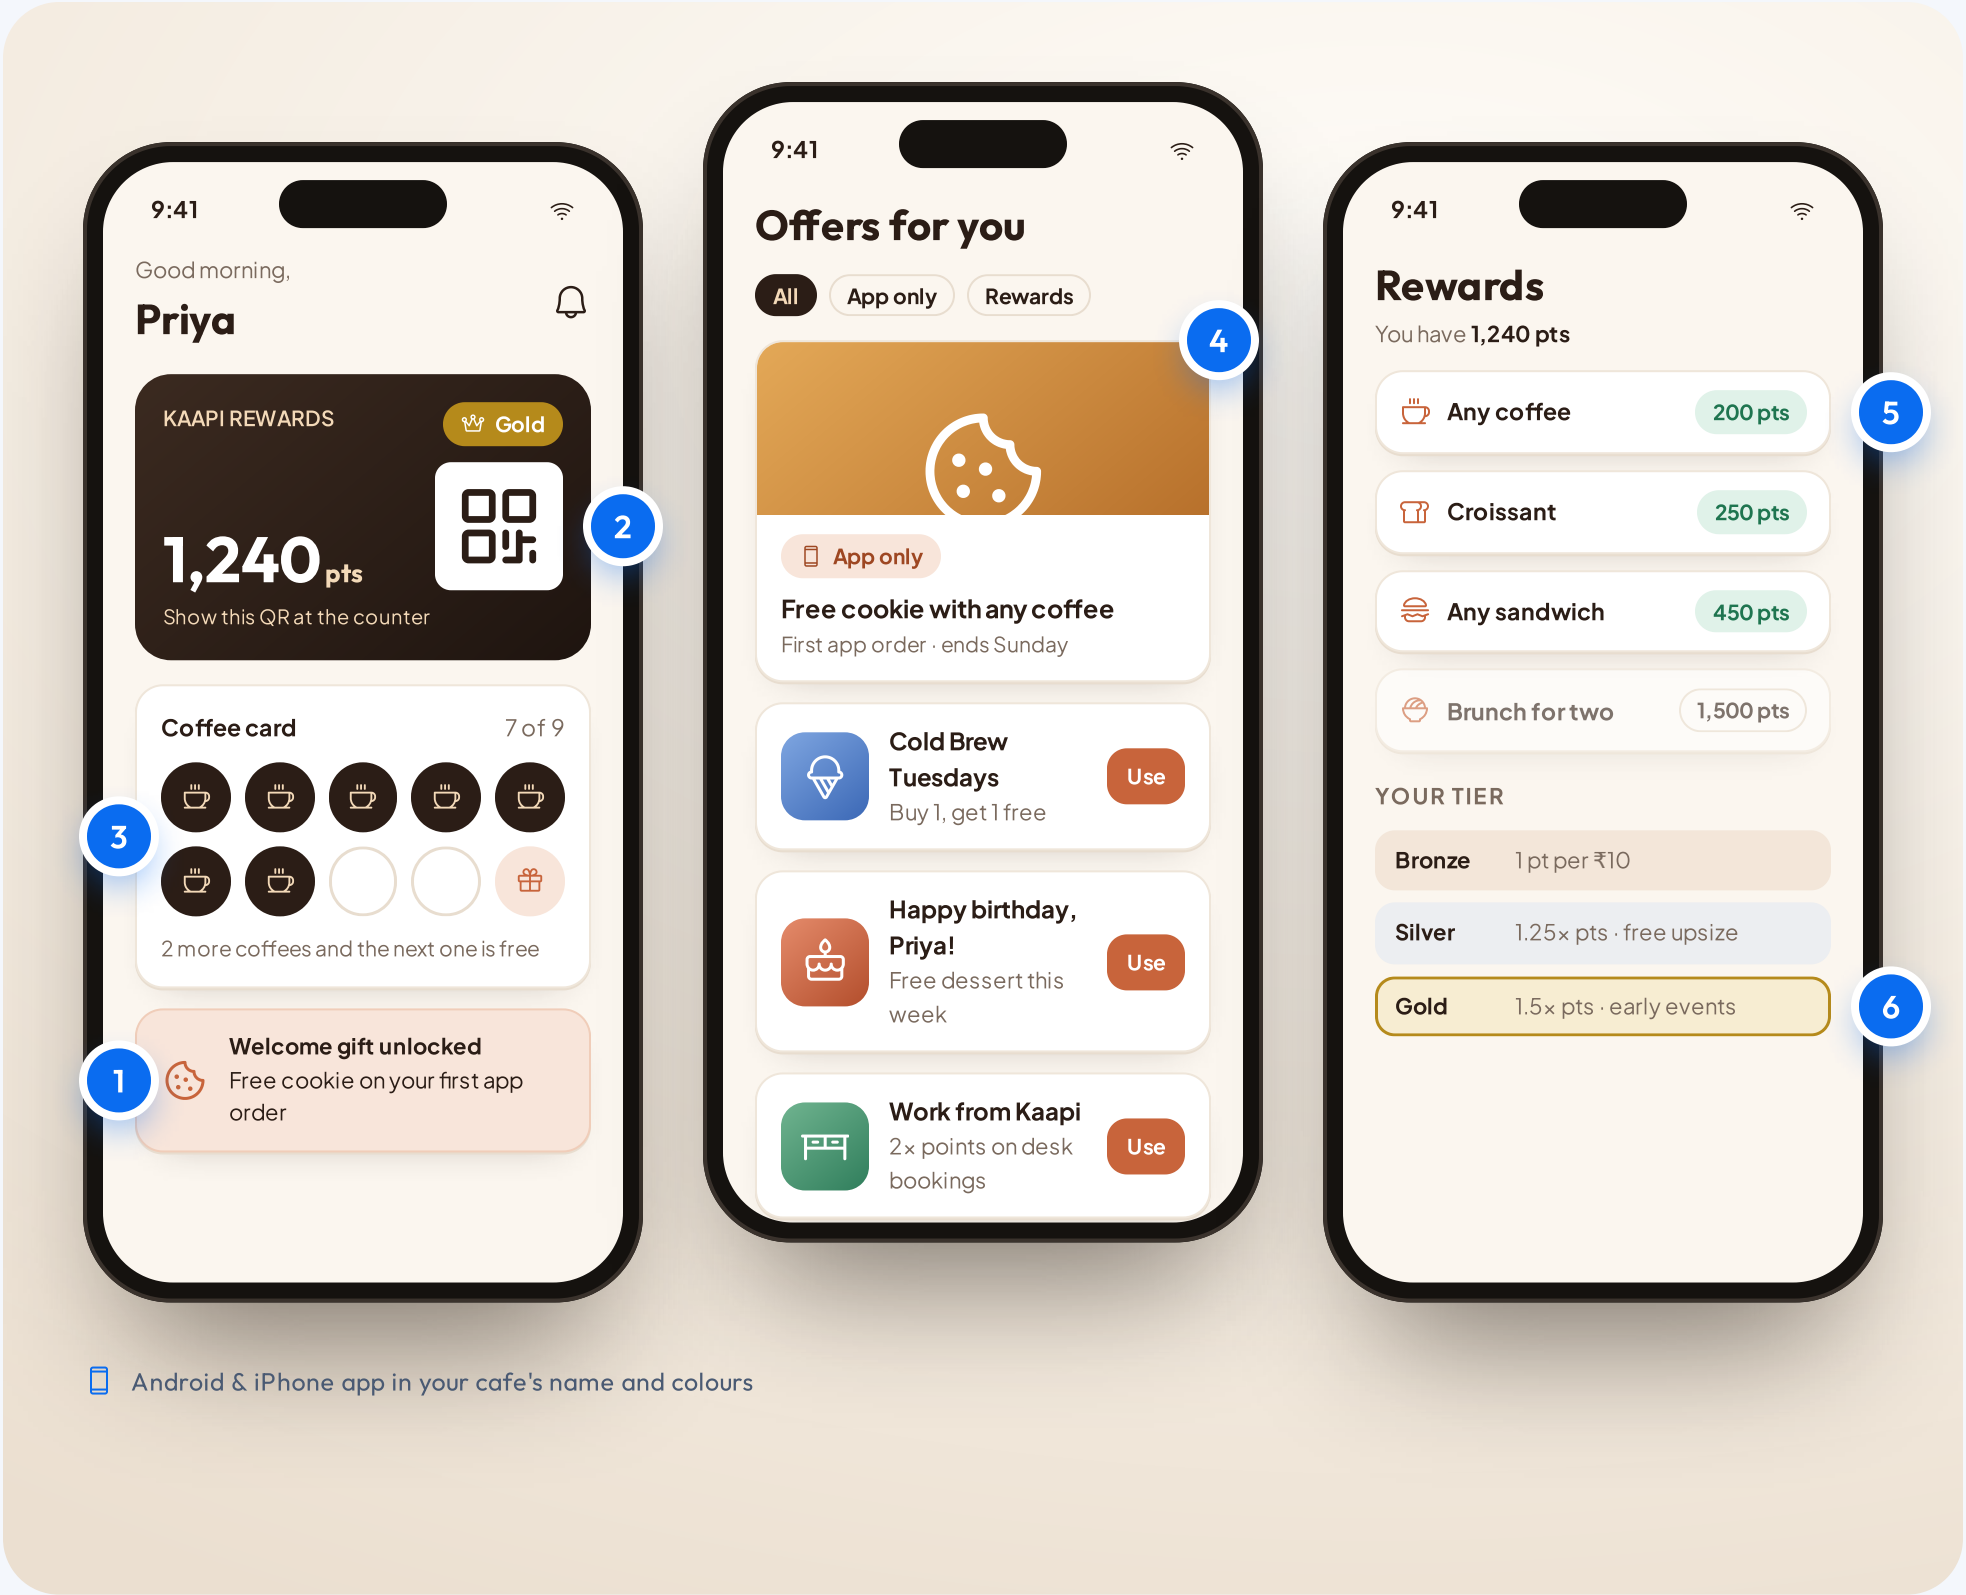

WHY IT MATTERS

- No lost slips
- See average prep time
- Calmer rush hours

Loyalty & rewards app

Like the big chains' apps, in your own brand. Guests earn on every visit and get offers that are only in the app, so they keep coming back.

- 1 **A reason to download**
"Free cookie on your first app order." Big chains use the same trick.
- 2 **Scan at the counter**
The guest shows their QR, the cashier scans it. Points land in seconds.
- 3 **Points & stamp card**
1 point per ₹10, plus a "buy 9 coffees, 10th free" card anyone understands.
- 4 **Offers just for them**
Birthday treat, weekday deals, rewards for their favourite items.
- 5 **Spend points on rewards**
A simple catalogue: 200 pts for a coffee, 450 for a sandwich.
- 6 **Tiers that feel special**
Bronze, Silver and Gold, with faster earning and early event access.

How the rewards engine works

You set the rules once in plain words. The system applies them to every bill and sends the right offer to the right guest on its own.

- 1

Set how guests earn

For example 1 point for every ₹10, double points on slow weekday afternoons.
- 2

Set tier levels

Guests move up as they spend more, and earn faster once they do.
- 3

Create automatic campaigns

"Not seen in 30 days" gets a comeback offer by app and WhatsApp.
- 4

See what worked

How many came back, what they spent, and the cost of the rewards.

WHY IT MATTERS

- 

More repeat visits
- 

Your own customer list
- 

Discounts only where they pay back

A WORKED EXAMPLE

₹420

Priya's bill for coffee and brunch

42 pts

1 point for every ₹10 spent

63 pts

She is Gold, so she earns 1.5 times

4 visits

and she has a free coffee (200 pts)

Extra sales (sample)

₹61,200

No app yet? No problem.

The cashier can add points with just a phone number. The guest gets an SMS with a link to the app.

Cowork space booking

Turn quiet hours into paid hours. Guests book a desk or meeting room by the hour, and you always know who is sitting where.

- 1

Choose the space

Hot desk, window desk or a meeting room for 4 or 8.
- 2

See free slots live

Green is free, amber is filling up, grey is full. No phone calls.
- 3

Pick a seat on the map

Near a power socket, by the window, or in the quiet zone.
- 4

Pay & get a QR pass

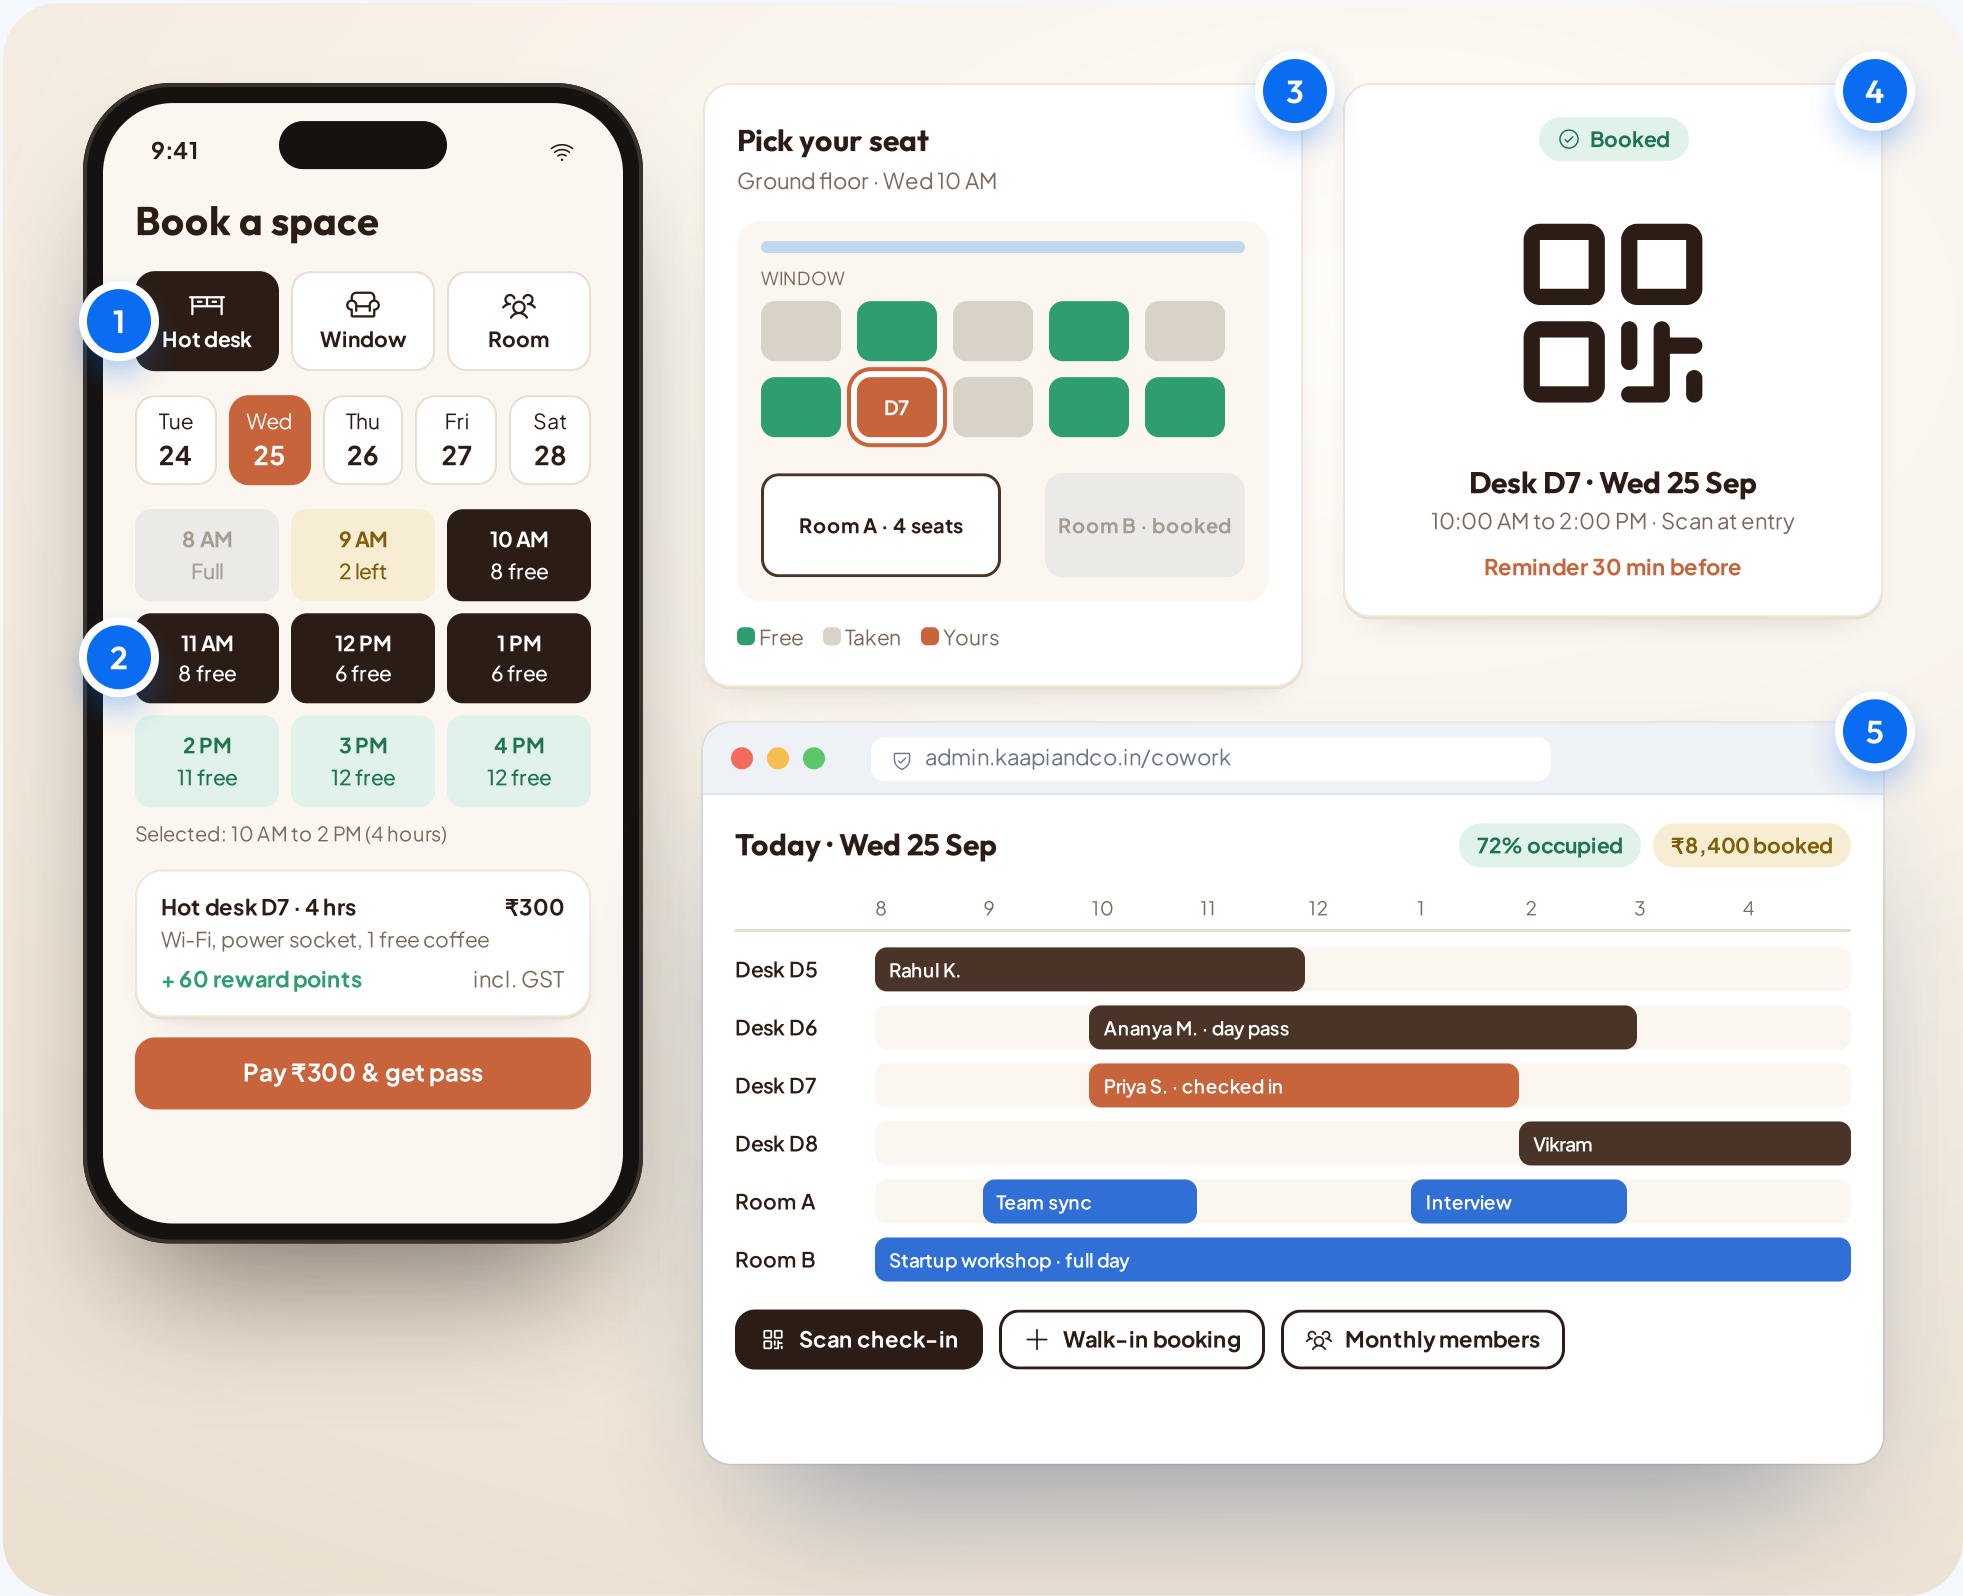

Price can include a coffee. Day passes and monthly packs too.
- 5

Front desk view

See every desk and room for the day, check people in and extend time.

WHY IT MATTERS

- Earn from quiet afternoons
- No double bookings
- Workers order more

Events & programs

Open mics, workshops, tastings, book clubs. Create an event once and the system does the promoting, booking, reminding and check-in.

- 1

Create it once
Title, date, seats and price. It appears on the website and in the app.
- 2

Followers get notified
App notification and WhatsApp to guests who like this kind of event.
- 3

Book & pay in a tap
Free RSVP or paid ticket, with a drink included if you like.
- 4

Automatic reminders
A day before and 2 hours before, so fewer people forget.
- 5

QR check-in at the door
See who came, who didn't, and award points for attending.

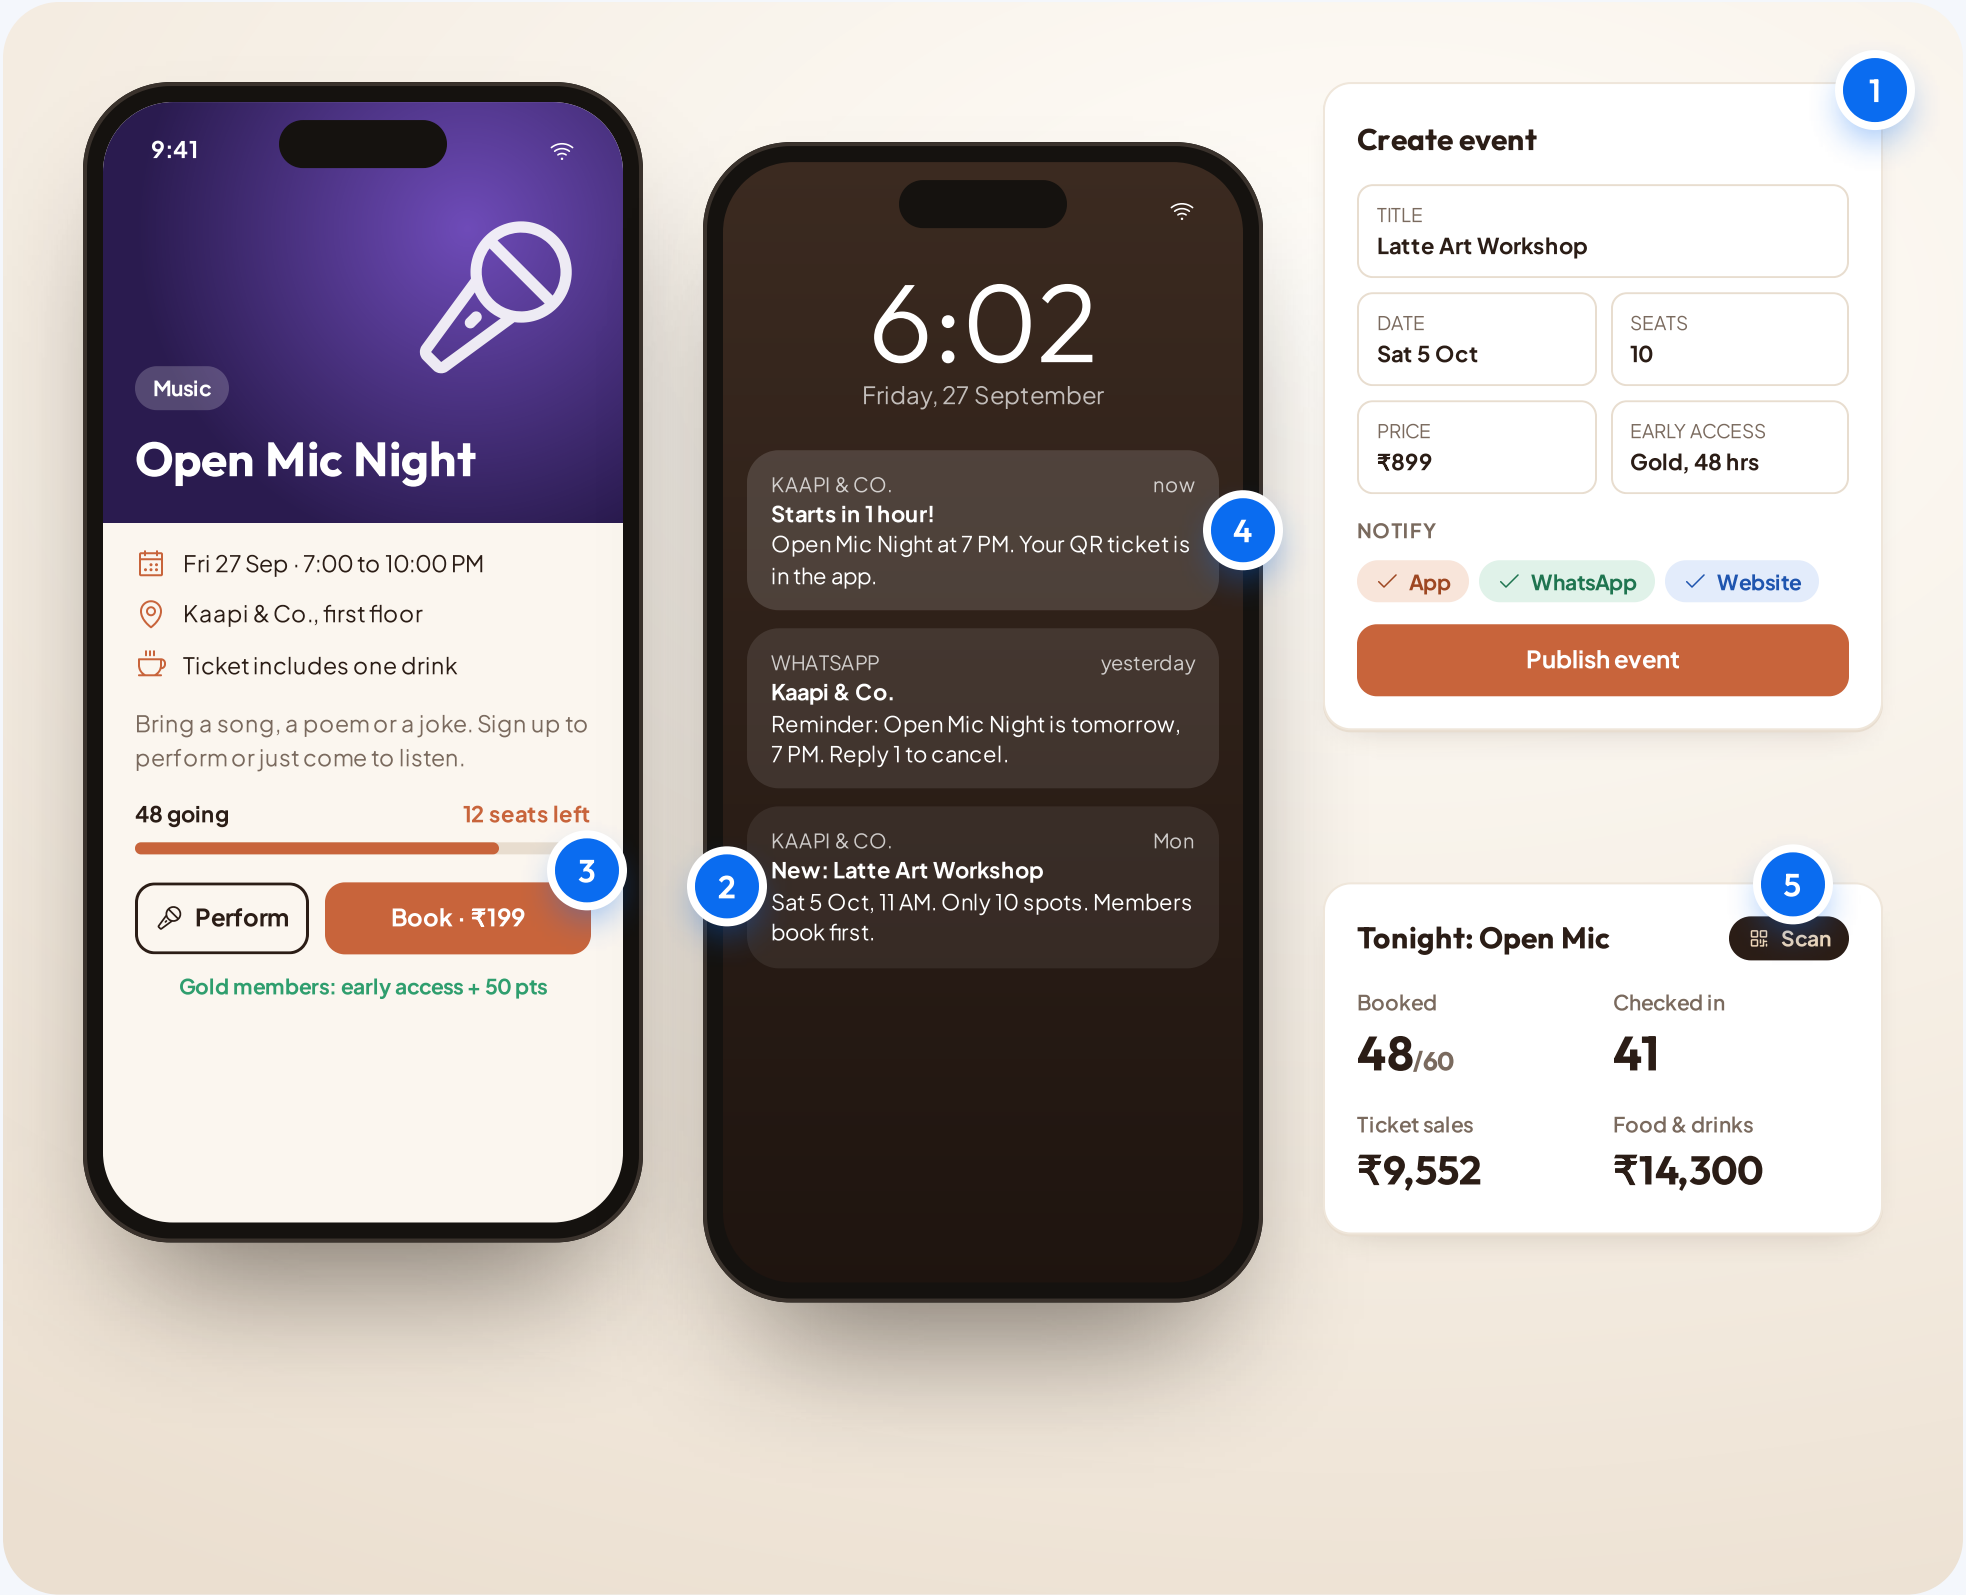

WHY IT MATTERS

- 🎫

Full seats on slow nights
- 🔔

Fewer no-shows
- 📣

Free promotion

Inventory management

Know what is on your shelves without counting every day. Each item on the menu has a recipe, so every sale reduces the right ingredients.

- 1

Stock at a glance

Every ingredient, how much is left and how many days it will last.
- 2

Recipes deduct stock

Sell one cappuccino and 18 g beans, 150 ml milk and one cup are taken off.
- 3

Low stock alerts

A warning before you run out, not after a guest is told "sorry".
- 4

One-tap purchase orders

The system suggests how much to order and sends it to your supplier.
- 5

Expiry & wastage

Use-first warnings for milk and bakes, and a log of what was thrown away.

WHY IT MATTERS

- 

Less waste
- 

Spot theft & over-pouring
- 

Never run out

LABS

Finance analytics

Your whole business on one screen, on your phone or laptop, updated with every bill. No waiting for the accountant at month end.

- 1

Today in four numbers

Sales, orders, average bill and profit margin, compared to last week.
- 2

Sales trend

See the last 30 days and spot good and bad weeks at once.
- 3

Busy hours

Plan staff shifts and happy hours around real footfall.
- 4

Where money comes from

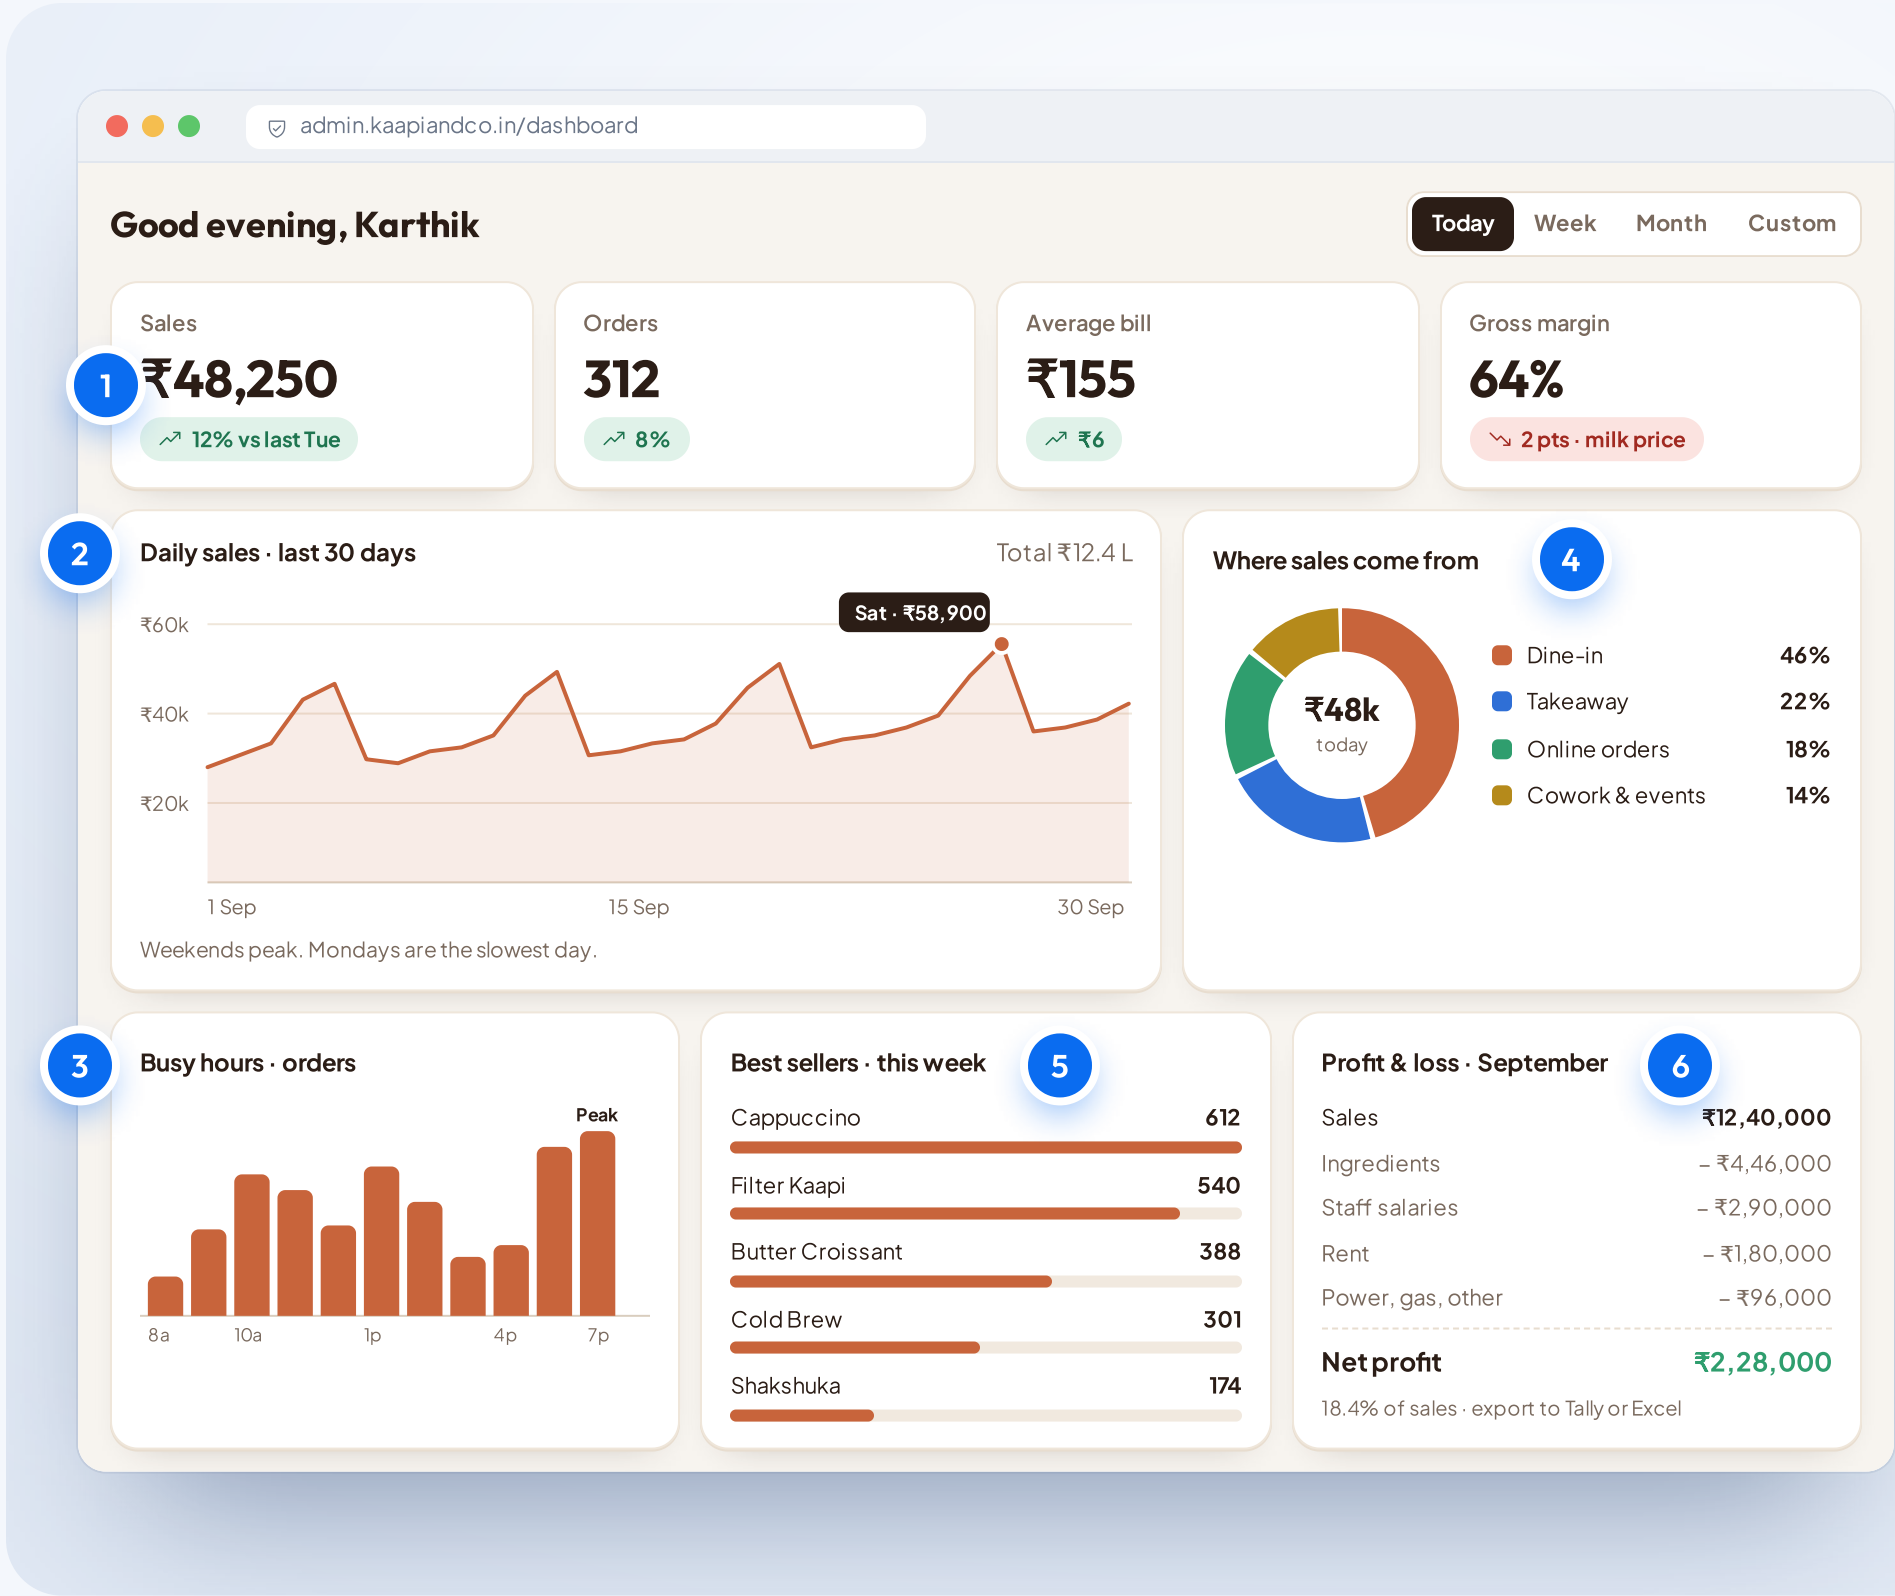

Dine-in, takeaway, online, cowork and events side by side.
- 5

Best sellers & profit

Which items sell most, and which actually make you money.
- 6

Profit & loss

Sales minus ingredients, staff, rent and bills, every month.

Billing & payments

Correct, GST-ready bills every time, paid the way the guest prefers, and a till that balances at the end of the day.

- 1

GST done for you

CGST and SGST split on every bill, with your GSTIN and FSSAI number.
- 2

Every way to pay

UPI QR on the bill, card machine, cash, or wallet and points.
- 3

Split the bill

Equally, by item or by amount, for groups and office lunches.
- 4

Digital receipts

Printed or sent on WhatsApp and SMS. Saves paper, collects numbers.
- 5

Day-end closing

Cash expected vs counted, and every payment type totalled in one report.

WHY IT MATTERS

- Tax-ready books
- Till always balances
- Quicker checkout

Kaapi & Co.

Thanks Priya! Your bill KC-24-08812 for ₹849 is attached.

Invoice.pdf

You earned 63 points. Balance: 1,123.

Start with what hurts most. Add the rest when you're ready.

You don't need all eight on day one. Here is a common path. Every module plugs into the ones already running, so nothing is thrown away as you grow.

PHASE 1 · OPEN FOR BUSINESS

Serve faster

The daily basics that every guest notices.

 Counter & kitchen screens

 Billing & payments

 Website with menu

Result: shorter queues, correct orders, GST-ready bills.

PHASE 2 · KNOW YOUR GUESTS

Bring them back

Turn one-time visitors into regulars.

 Loyalty & rewards app

 Events & reminders

 Cowork booking

Result: more repeat visits and full seats on slow days.

PHASE 3 · RUN IT BY THE NUMBERS

Grow profit

See where money is made and lost.

 Inventory & recipes

 Finance analytics

 More outlets, one dashboard

Result: less waste, better margins, decisions backed by data.

Works on what you have

 Android tablet or iPad

 Any laptop browser

 Thermal printer

 Guest's own phone

What we need from you to begin

 Menu & prices

 Logo & colours

 GST & payment details

 Staff list & roles

NEXT STEP

Tell us which screens fit your cafe.

Everything in this deck is a starting point. We shape each screen around your menu, your team and the way you already work, then build it with a dedicated team.

 Which modules would help you most this year?

 How many counters, kitchens and outlets do you run?

 Any software you already use that should connect?

 When would you like the first module live?
