

SOFTWARE FOR FASHION & FOOTWEAR STORES

Sell in store, online and in your own app.

What your shoppers, your cashier and you would see.
Shopify online, your shop floor and your own app, sharing
one stock and one customer list.

Shopify store

Shopping app

Loyalty & coupons

New arrivals

Billing

Inventory

CRM

Analytics

Eight modules. Your shop floor and your online store, finally talking.

Most stores run the shop on one system and the website on another, and neither knows the customer. Here every sale, in store or online, updates the same stock, the same customer profile and the same rewards.

01

Shopify store & theme

An online store on Shopify with a theme designed around your brand, not a template.

Shoppers

02

Your own shopping app

Shoppers browse, save to wishlist, apply coupons and buy, or reserve to try in store.

Shoppers

03

Loyalty & coupons

Points, tiers and "₹300 off your next visit" coupons that bring shoppers back.

Shoppers Owner

04

New arrival alerts

Tell app users about new drops, back-in-stock sizes and price drops, for free.

Owner Shoppers

05

Billing counter

Scan, bill, apply coupons, handle exchanges and print GST invoices in seconds.

Cashier

06

Inventory

Stock by size and colour, across every store and online, with reorder and ageing alerts.

Store manager

07

Customer CRM

Know each shopper's size, style and spend. Send the right offer on WhatsApp.

Owner Staff

08

Sales analytics

Store vs online, best styles, sizes that sell, coupon returns and staff performance.

Owner Accountant

Follow one shopper, Meera, from first click to fifth visit.

Each step is a screen shown later. See how the app and coupons keep her coming back.

Meanwhile, behind the counter

One system connects the store, Shopify and the app. Nobody types anything twice.

One stock count

A pair sold in store is gone from the website in seconds. No overselling.

One customer profile

Store bills, online orders and app activity build one history per shopper.

One set of numbers

Store and online sales, coupons and profit in the same dashboard.

Shopify store & custom theme

We set up your online store on Shopify, the platform thousands of brands trust, and design a theme that looks like *your brand*, not a template.

- 1 **A theme made for your brand**
Your colours, fonts, photos and layout. You change banners and sections yourself, no coding.
- 2 **Collections & size filters**
Shop by category, size, colour and price. Only sizes in stock show up.
- 3 **Badges that sell**
New, Bestseller, Only 2 left and Sale tags added automatically.
- 4 **Size guide & reviews**
Fewer wrong-size returns, more trust from first-time buyers.
- 5 **Easy checkout**
UPI, cards, pay later and cash on delivery. Pick up in store as an option.

WHY IT MATTERS

- Sell 24x7
- Found on Google
- Looks premium

Shopify, connected to your shop floor

Shopify runs the website. Our system sits in the middle and keeps the website, the store counter and the app in sync, every few seconds.

- 1 Products added once**
Add a style with photos, sizes and price. It appears on the website, in the app and at the billing counter.
- 2 Stock always matches**
Sell the last UK 8 in store and it disappears online. No "sorry, it's sold out" emails.
- 3 Orders from everywhere, one list**
Website, app and WhatsApp orders reach the store for packing or pickup.
- 4 Shipping & payments plugged in**
Courier pickup, tracking and payments connect through Shopify apps.

WHY IT MATTERS

- ✓ No overselling
- 🕒 No double data entry
- 👥 One customer list

Your own shopping app

An app in your store's name on Android and iPhone. Shoppers pick what they like, apply their coupons and buy, or reserve it to try in store.

- 1 A reason to download**
"₹200 off your first app order." App users are your best customers.
- 2 Shop by their size**
The app remembers her size and only shows what fits and is in stock.
- 3 Wishlist that sells**
Saved items trigger alerts when they are back in stock or on sale.
- 4 Home delivery or try in store**
Reserve for 24 hours and try at your nearest store before paying.
- 5 Coupons & points at checkout**
Her coupons show up automatically. One tap to apply the best one.

Android & iPhone app in your store's name and colours

Loyalty & come-back coupons

Every purchase plants the reason for the next one. The shopper leaves with points and a coupon that only works on their *next* visit, with a deadline.

- 1 Next-visit coupon on every bill**
"₹300 off your next purchase, valid 30 days." Printed on the bill and saved in the app.
- 2 A coupon wallet**
All her coupons in one place, with the expiry date counting down.
- 3 Points on every rupee**
Store, website or app, it all counts. Spend points like cash.
- 4 Tiers with real perks**
Silver and Gold get early sale access, free alterations and a birthday gift.
- 5 Refer a friend**
"Give ₹250, get ₹250." Your happiest customers bring new ones.

3

4

5

How the coupon engine works

You decide the rules once. The system hands out the right coupon at the right moment, stops misuse, and shows you if it made money.

- 1

Build a coupon in a minute
Flat ₹, percentage, buy-2-get-1 or free gift. Set minimum bill and expiry.
- 2

Guard your margin
Exclude sale items, one use per customer, only on new arrivals, only in store.
- 3

Automatic triggers
Coupons issue themselves: after a purchase, on app download, on birthdays, or when a customer goes quiet.
- 4

See the return
Coupons issued, used, extra sales they brought and what the discounts cost.

WHY IT MATTERS

- 

More repeat visits
- 

No coupon misuse
- 

Discounts that pay back

A WORKED EXAMPLE

₹3,499

SPARTA LABS

New arrival & back-in-stock alerts

Every app download is a free marketing channel. When new stock lands, the right shoppers hear about it the same hour, at no cost per message.

- 1

New drop alerts

Shoppers who bought sneakers hear about new sneakers, not everything.
- 2

Back in your size

Out-of-stock item on a wishlist? She's told the moment it's restocked.
- 3

Price drop & sale early access

Wishlist items on sale, and Gold members get the sale a day early.
- 4

Pick who hears it

Filter by what they bought, their size, their store and their tier.
- 5

See who came

Opens, store visits and sales from each message.

WHY IT MATTERS

- 📄

Free vs paid SMS
- ⚡

New stock sells faster
- 🎯

Relevant, not spam

Why the app download matters

📱

An SMS costs money every time. An app notification is free, carries a photo and opens straight to the product.

MODULE 04 · NEW ARRIVAL & BACK-IN-STOCK ALERTS

09

SPARTA LABS

Billing counter

Scan the barcode, the bill builds itself. Coupons, points, exchanges and GST are handled without the cashier doing maths.

- 1 **Scan & go**
Barcode brings up the style, size and colour. No typing product names.
- 2 **Find the customer by phone**
Her coupons, points and past purchases appear instantly.
- 3 **Coupons checked automatically**
Only valid coupons apply. Expired or misused ones are blocked.
- 4 **Size not here? Sell it anyway**
Order from another store or the warehouse, delivered to her home.
- 5 **Exchanges & returns**
Scan the old bill, swap the size, issue store credit if needed.
- 6 **GST bill, any payment**
Right GST rate per item. UPI, card, cash, points or a mix. Bill on WhatsApp.

MODULE 05 · BILLING COUNTER

10

SPARTA LABS

Inventory by size & colour

In fashion, "we have it" means nothing without the size. See every style as a size-by-colour grid, in every store and online.

- 1

Size & colour grid

Instantly see which sizes are selling out and which are sitting.
- 2

Every location at once

Each store, the warehouse and online stock side by side.
- 3

Smart transfers

Move slow sizes from one store to where they sell, before you reorder.
- 4

Ageing stock alerts

Styles unsold for 90 days are flagged for a sale or a bundle offer.
- 5

Reorder & labels

Purchase orders to your vendor, and barcode labels printed on arrival.

WHY IT MATTERS

- 📈

Fewer lost sales
- 💰

Less money stuck in stock
- 📦

Faster receiving

SPARTA LABS

Customer profiles & CRM

Your best salesperson remembers every regular. Now the whole team does. Each shopper's size, style and history in one profile.

- 1

Her sizes, remembered

Shoe, top and waist size, so staff pull the right size first time.
- 2

Everything she bought

Store and online, with returns, spend and favourite brands.
- 3

Wishlist & coupons

What she wants next and which offers she still has.
- 4

Ready-made groups

VIPs, sneaker lovers, lapsed shoppers, wedding season buyers.
- 5

Message a group on WhatsApp

A personal note to 200 VIPs before the festive sale, in two clicks.

Schedule

Sales analytics

Store and online in one view, on your phone. Know what sells, in which size, and whether your offers are paying for themselves.

- 1

Today in four numbers

Sales, bills, average bill and repeat customers, against last week.
- 2

Store vs online vs app

Where your money comes from, and how the app share is growing.
- 3

The size curve

Which sizes sell, so you buy the right mix next season.
- 4

Best & worst styles

Sell-through by style. Reorder winners, clear losers early.
- 5

Staff performance

Sales, bills and app sign-ups per staff member, for fair incentives.

More we can build **when you're ready.**

These plug into the same stock and customer data, so each one is quicker to add once the core is running.

WhatsApp shopping

Your catalogue inside WhatsApp. Shoppers browse, ask for a size and pay by UPI link in the chat.

Sell where they chat

Reserve & try in store

Hold items online for 24 hours. Staff get the order ready in the trial room.

Online to store visits

Gift cards & store credit

Digital gift cards for festivals and weddings, and credit notes instead of cash refunds.

Keeps money in store

Alterations tracker

Log hemming or fitting jobs, set a ready date, send the shopper a "ready to collect" message.

Fewer missed pickups

Marketplace sync

List on Amazon, Myntra or Ajio from the same stock, so a sale anywhere updates everything.

More reach, one stock

Staff app & incentives

Staff check stock from the floor, see targets and earn incentives on sales and app sign-ups.

Motivated team

Returns & exchange portal

Online shoppers request a return or size swap themselves. Courier pickup is booked for them.

Less support work

Sale & season planner

Plan the festive and end-of-season sale: which styles, what discount, what it will cost.

Planned, not panicked

Start with what hurts most. Add the rest when you're ready.

You don't need all eight on day one. Here is a common path. Every module plugs into the ones already running, so nothing is thrown away as you grow.

PHASE 1 · SELL EVERYWHERE

Get online, bill right

The basics every shopper notices.

 Shopify store & custom theme

 Billing counter

 Inventory synced with Shopify

Result: an online store that never oversells, and a fast counter.

PHASE 2 · BRING THEM BACK

Own your customers

Turn one-time buyers into regulars.

 Your shopping app

 Loyalty & coupons

 New arrival alerts

Result: app downloads, repeat visits and free marketing.

PHASE 3 · RUN IT BY THE NUMBERS

Grow profit

Buy smarter and sell to the right people.

 Customer CRM & WhatsApp

 Sales analytics

 More stores & add-ons

Result: less dead stock, better buying, higher repeat rate.

Works on what you have

 Billing PC or tablet

 Barcode scanner

 Bill & label printer

 Shopper's own phone

What we need from you to begin

 Product list & prices

 Logo, colours & photos

 GST & payment details

 Shopify account (or we set it up)

NEXT STEP

Tell us which screens fit your store.

Everything in this deck is a starting point. We shape each screen around your products, your team and the way you already sell, then build it with a dedicated team.

 Which modules would help you most this season?

 How many stores, and do you sell online today?

 Which billing software or Shopify apps do you use now?

 Should we be live before the festive sale?
